OUR OBJECTIVES ARE TO MANUFACTURE PRODUCTS:

To be user safe – to be environmentally friendly – to conquer the task at hand

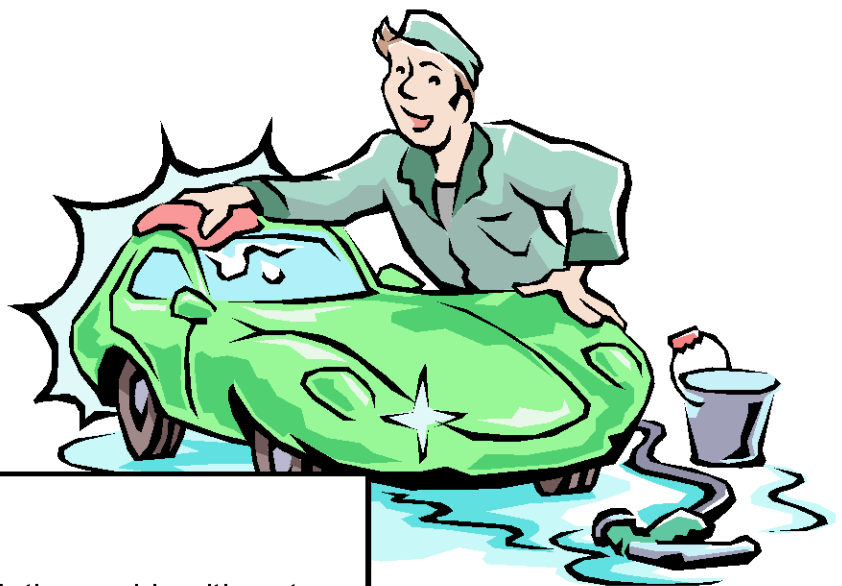

Automotive Wash 'n' Wax **AUTO SHAMPOO WITH HIGH GLOSS SILICONE AND** **WAX POLISH**

NEUTRAL—NO SOLVENTS—BIODEGRADABLE

Cleans & restores shine in one simple operation. Powerful detergents go to work on road grime, oil and pollutant particles that are responsible for much of the premature dulling of paintwork and trim. Simultaneously, a modern silicone/wax system fills small scratches and protects with a high gloss film that is mechanically durable. Ideal for use on paint, chrome, fiberglass, steel, glass, rubber and aluminium. A neutral pH ensures previous protective wax films are not removed.

DILUTION RATES:

- For general conditions of surface contamination, mix one part WASH 'n' WAX with 50 parts of warm or cold water (20 ml per Litre).
- For heavy build up, or wheel washing, mix one part WASH 'n' WAX with 20 parts water (50ml per Litre).

First Aid Instructions

- **Swallowed:** If swallowed, rinse mouth thoroughly with water. Do not induce vomiting. Seek medical attention.
- **Eyes:** Immediately irrigate with copious quantities of water.
