# Mountain Cleaning Products

**OUR OBJECTIVES ARE TO MANUFACTURE PRODUCTS:  
To be user safe – to be environmentally friendly – to conquer the task at hand**

## “RIP OFF” Calcium Descaler

RIP OFF is a combination of acids, designed for the removal of calcification build up on **stainless steel urinals, toilet bowls and swimming pools.**

- For extreme calcium build ups that have occurred over a long period of time, the product may have to be applied neat (undiluted) several times using a fine nylon scouring pad to agitate RIP OFF into the calcium.
- For daily maintenance after the removal of calcium build ups, a dilution of 20-1 (50 ml product to 1 litre of water) should be used.
- Due to Hydrochloric Acid in the formulation, care must be taken when using RIP OFF on stainless steel. Ensure the product is applied, agitated and rinsed off immediately to eliminate discolouration of the stainless steel.
- Personal care must also be taken when using RIP OFF. Rubber gloves, overalls, face shield or goggles and rubber boots should be worn.

### **First Aid Instructions**

- **Swallowed:** If swallowed, rinse mouth thoroughly with water. Do not induce vomiting. Seek urgent medical attention.
- **Eyes:** Immediately irrigate with copious quantities of water for at least 15 minutes holding eyelids open. Seek immediate medical attention & continue irrigating eyes while in transit.
- **Skin:** Immediately remove contaminated clothing and wash skin thoroughly with water for at least 30 minutes.
- **Inhaled:** Remove victim from exposure—avoid becoming a casualty. Seek immediate medical attention.

**POISON**
