SECTION 4: FIRST AID MEASURES

First Aid Facilities:	Normal washroom facilities. Safety shower and emergency eyewash.
Eye Contact:	Immediately irrigate with copious quantities of water for at least 20 minutes. Eyelids to be held open. Avoid rinse water entering uncontaminated eye. Seek medical advice (e.g. ophthalmologist) if there are ongoing symptoms.
Skin Contact:	Wash contaminated skin with plenty of water. Seek medical advice if irritation develops.
Inhalation:	Remove victim to fresh air away from exposure - avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position, keep warm and at rest. If breathing is laboured and patient is cyanotic (blue), ensure airways are clear and have a qualified person give oxygen through a mask. If breathing has stopped apply artificial respiration at once and seek medical assistance.
Ingestion:	Do NOT induce vomiting. If conscious, rinse mouth thoroughly with water and give water to drink. If vomiting occurs, give further water to achieve effective dilution. Seek medical advice.
Advice to Doctor:	No specific antidote. Treat symptomatically. All treatments should be based on observed signs and symptoms of distress of the patient. Poisons Information Centre in each Australian State

Scheduled Poisons:	Poisons Information Centre in each Australian State capital city can provide additional assistance for scheduled poisons. Phone Australia 13 11 26.

SECTION 5: FIRE FIGHTING MEASURES

Fire and Explosion Hazard:	Water based, not combustible. However if involved in a fire will emit toxic fumes. Can react with metals to form flammable hydrogen gas.
Extinguishing Media:	Use fine water spray, normal foam or dry agent extinguisher (carbon dioxide or dry chemical powder).
Fire Fighting:	Keep containers exposed to extreme heat cool with fine water spray. Fire fighters to wear self contained breathing apparatus if risk of exposure to products of combustion or decomposition. Evacuate area and move upwind of fire.
Flash Point:	None.
Hazchem Code:	None.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Minor Spills:	Do not normally require special clean-up measures. Absorb spills and rinse area with water.
Major Spills:	For example transport accident or bulk spill. Clear area of unprotected personnel. Prevent spillage from entering drains or watercourses. Wear appropriate protective equipment (see section 8) to prevent skin and eye contamination. Contain spillage, then cover/absorb spill into dry, inert material (e.g. sand, earth or vermiculite), collect and place into suitable containers, appropriately labeled, for disposal by an approved agent according to local conditions. Spillage area may remain slippery. Flush spill area with water. If contamination of sewers or waterways has occurred advise the local emergency services. In the event of a large spillage notify the local environment protection authority or emergency services.

Storage:	Store in a cool, dry place with good ventilation. Avoid storing in aluminium or light alloy containers. Store away from incompatible materials (see Section 10 of this SDS). Keep containers closed at all times and check regularly for leaks.

SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

OCCUPATIONAL EXPOSURE LIMITS: None established for this product.

Ingredient	TWA	STEL	Notes
Ethanolamine	3ppm, 7.5mg/m ³	6ppm, 15mg/m ³	

Personal Protection:	Use good occupational work practice. The use of protective clothing and equipment depends on the degree and nature of exposure. Final choice of appropriate protection will vary according to the individual situation and according to risk assessments taken.
Engineering Controls:	Ensure ventilation is adequate. Avoid generating mists of the product. Ensure airflow, where the concentrated product is handled, is directed away from operators.
Eye and Face Protection:	Safety glasses when handling concentrated product due to pH effect (pH>12) on eyes.
Hand and Skin Protection:	Wear gloves when handling concentrated product and for prolonged use at dilution. Not required for normal use conditions. When handling large quantities e.g. spills and where heavy contamination is likely, wear long gloves, coveralls and

	reaction with acids can yield heat and pressure, which can burst a closed container. Attacks many reactive metals (aluminium, magnesium, zinc), releasing highly flammable hydrogen gas that is a fire or explosion hazard.
Conditions to Avoid:	Extremes of temperature and excessive direct sunlight.
Incompatible Materials:	Reacts vigorously with acids. Reacts with metals salts, peroxides and reducing agents.

SECTION 11: TOXICOLOGICAL INFORMATION

Inhaled:	Breathing in mists or aerosols may result in respiratory irritation including a burning sensation, coughing, wheezing, and shortness of breath and possible spasm.
Skin Contact:	Skin irritant – may cause redness, pain and blistering. Irritation will continue until removed.
Eye Contact:	Contact will cause stinging, blurring, watering and pain. pH of product will contribute to this effect.
Ingestion:	Swallowing can result in irritation to the throat and oesophagus, nausea, abdominal pain, vomiting, reduced blood pressure, slow pulse and cyanosis.
Acute Toxicity:	Not toxic by calculation. No LD50 data available for this product. For constituent, sodium metasilicate pentahydrate (at 59%): Oral LD50 (rat) – 1152-1349mg/kg. For active constituent, ethanolamine (at 100%): Oral LD50 (rat) - 1720mg/kg.
Chronic:	No information available.

SECTION 12: ECOLOGICAL INFORMATION

Ecotoxicity:	Not toxic by calculation to aquatic life. No LC50 data available for this product. Avoid contaminating waterways. The product is alkaline. If large spills occur and are not neutralised, a water pH rise could be responsible for an environmental effect on aquatic organisms (pH > 9 can have an effect on fish, with possible fish death and pH > 8.5 can be destroying for algae).
